HI ! I'M CHANE

**i am a passionate beauty therapist wanting to help each and every woman feel their best !
thats why for the last 3 years i did research on body sculpting and machines helping me to get
those results for patients.**

**our machine is one of a kind top of the range when it comes to body sculpting NOT only does it
freeze you to lose CM but it tones and build muscle aswell!**

**when i was searching for the perfect machine i didn't want patients to ONLY lose fat but to
tighten skin and help muscle building aswell. That is exactly what i found in this amazing
machine**

**with extraordinary results we are the proud owner of the very first machine in the whole Free
State**

i am so excited to start you on your journey!

LET'S DO IT!

Chane xo

FAT FREEZING

ARE YOU CONCERNED WITH STUBBORN POCKETS OF FAT?

Do you find that irrespective of how well your diet is, or how much you exercise, you still retain stubborn pockets of fat on your body? Whether it's stubborn fat pockets on the abdomen, love handles, thighs, banana rolls, arms, underarms, back, chin or male chest, we can help.

At Sculpt Face & Body Aesthetics, we combine a holistic approach with science-backed technology to help shift stubborn fat pockets for good.

what is fat freezing??

Cryolipolysis fat freezing is a breakthrough, noninvasive treatment that uses controlled cooling technology to permanently kill up to 30% of fat cells within each treatment, without the need for invasive surgery or post-treatment downtime.

It is one of the most effective non-surgical ways to permanently remove stubborn pockets of fat that are resistant to diet and exercise.

Over the past few years, fat-freezing has become a mainstream option to reduce stubborn fat pockets.

Due to advances in the technology used, the treatment is now a more affordable and viable option for many, to remove stubborn fat from parts of your body that often refuse to budge.

How does it work?

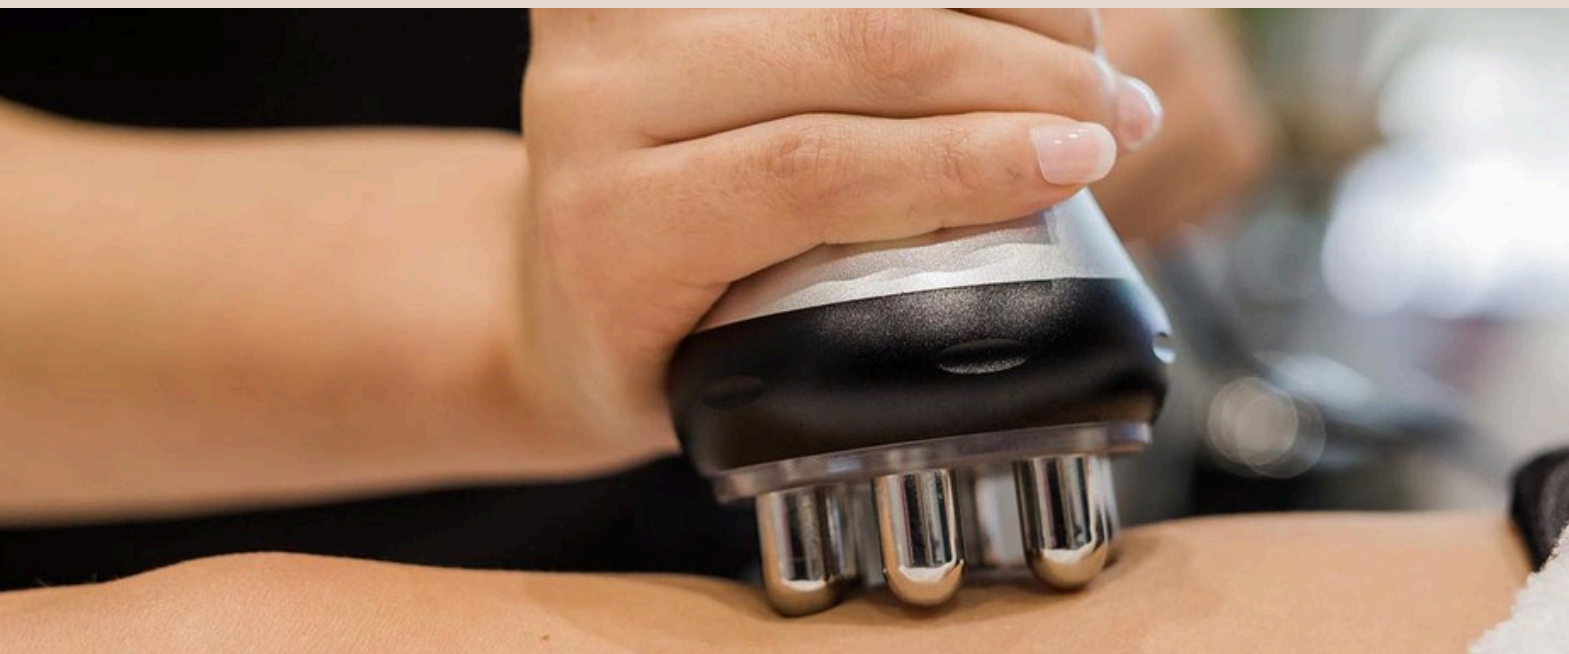

- A special vacuumed applicator is applied to an area of the body and a controlled cooling technique lowers the treatment area to -10degrees Celsius.
- Cooling energy treats the fat layer without any damage to surrounding cells.
- As fat cells cannot survive at this temperature, these fat cells crystallise, die and over a period of 12 weeks naturally eliminate from the body.
- The result: up to 30% of permanent fat cell death in treated areas!

Privacy

What are the benefits?

- Time and time again fat freezing has proven to be one of the best option of removing stubborn pockets of fat resistant to diet and exercise and one of the main benefits of fat freezing is that the treatments are completely non-invasive and requires no downtime, there is no risk of infection and is a time-efficient procedure.
- We use the latest technology with dual hand-pieces, meaning that multiple pockets of fat can be targeted in a single 60 minute session.

RADIO FREQUENCY

Skin tightening :

What is skin tightening?

Going under the knife used to be the only way to significantly tighten saggy skin. At Chique aesthetics Aesthetics we offer an advanced non-surgical skin tightening treatments, which are quickly becoming the preferred way to tighten up loose skin caused by ageing, pregnancy, weight loss and even genetics.

RADIO FREQUENCY

Radio frequency energy stimulates the production of collagen and elastin. Radio frequency stimulates collagen and elastin to contract and tighten skin fibres – visibly tightening, toning and rejuvenating the skin. This increase in blood will provide more oxygen to the skin and bring more nutrients to the tissue. A fresher, more youthful glow is common after treatments

FAT CAVITATION

WHAT IS FAT CAVITATION??

From the latest fat loss trends to vigorous exercise routines, to strict diets and beyond – it comes as no surprise that for many of us, losing stubborn pockets of fat and maintaining body goals can be confusing and challenging.

With liposuction being a costly and invasive solution to a problem so many of us face, fat cavitation is a ground-breaking alternative.

Ultrasonic fat cavitation is a revolutionary body shaping treatment that melts fat away and shapes the body for immediate centimeter loss without the extensive risks of traditional fat reduction techniques like liposuction.

HOW DOES IT WORK?

cavitation works using a low-frequency ultrasound which subjects fat cell membranes to a strong wave of pressure. The fat cells can't withstand this pressure and turn into liquid, free fatty acids. The body then moves the fatty acids through the lymphatic system and the liver, to be naturally metabolised by the body. The result is immediate centimeter loss.

Areas that can be treated include abdomen, love handles, inner thighs, outer thighs, buttocks, and arms.

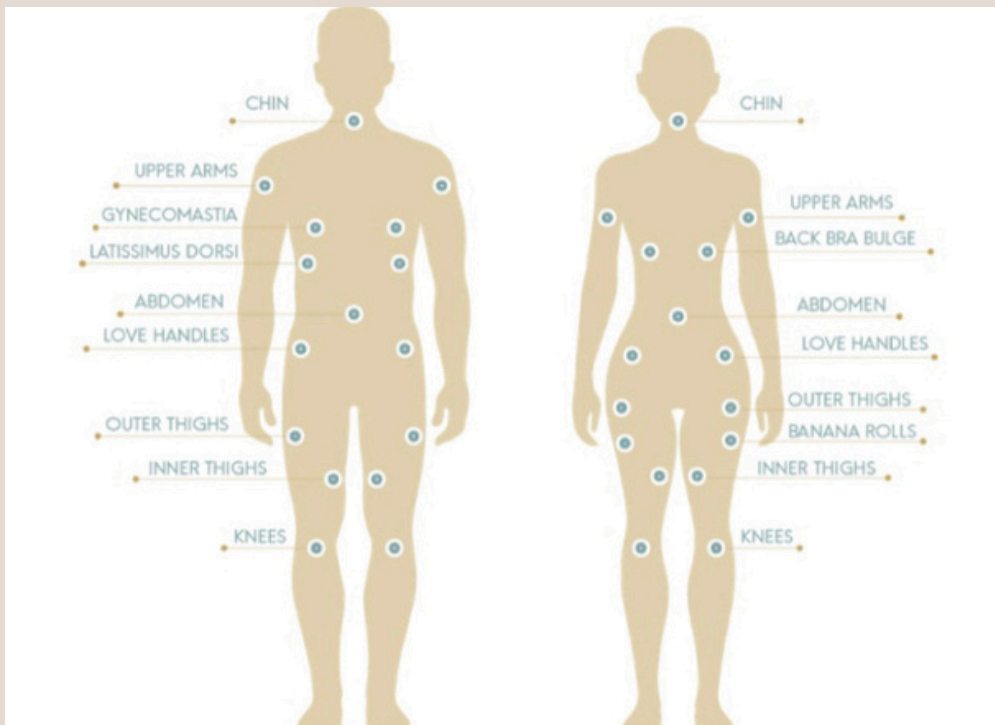

LASER LIPO

WHAT IS LASER LIPO?

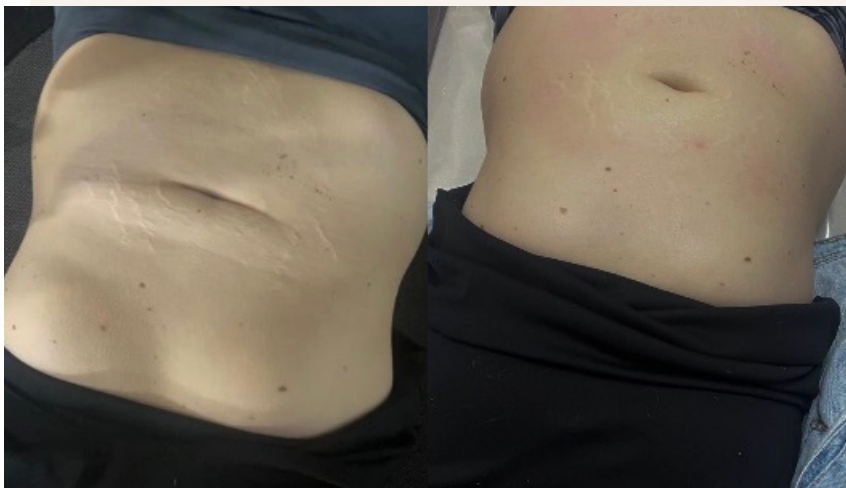

Laser lipolysis is a non-invasive form of body sculpting. It removes small fat deposits. Like surgical liposuction, this procedure permanently removes fat cells from your body. It's much less painful, though, and laser lipolysis recovery is also shorter and less complicated

BODY SCULPTING

Services

BODY SCULPTING

With our top of the range machine we can provide you with all the body sculpting needs you can ever have. our machine includes lazer lipo therapy, radio frequency, fat freezing and cavitation

Fat freezing :

upper tummy	R600
lower tummy	R600
upper back	R600
lower back	R600
hips	R600
inner thighs	R600
outer thighs	R600
inner arms	R600
bra buldge	R500
love handles	R500
Buttocks	R600
double chin	R300

(Choose any 2 body areas and only pay R1000)

LIPO LASER :

This treatment utilizes a 100% non-invasive laser based spot fat reduction and body contouring

Per treatment per area - 50MIN R480

ultrasonic Cavitation :

This treatment tones the body using low ultrasonic waves to breakdown fat cells. Used to reducing cellulite and localized fat.

treatment per area - 30 min. R480

Radio Frequency

Controlled RF energy into deeper layers of the skin, heating tissues, causing collagen fibres to contract and tighten. resulting in firmer, smoother skin

Per Treatment per area Body - 30 min R 450

Per Treatment per area Face - 30 min R400

EMS muscle build and repair

Uses electrical impulses and massage techniques to stimulate muscle contractions on a specific area.

Improving muscle strength and tone as well as athletic performance and assists with diastasis recti in women - 30 MIN per area R400

Very important information:

membrane / what is a membrane ?

The membrane is used for protection of the skin from Frost bites when you fat-freeze an area during the cryotherapy. One membrane to be used per treatment. you can take the membrane home and bring it along for your next session. (R100 extra per membrane)

booking policy :

when making a booking a 50% deposit will be asked in advance to secure your booking.

cancellation policy:

cancellations need to be made 24 hours in advance with a no return policy for the deposit as the treatment is very expensive and time consuming.

please keep in mind sessions may take a while to complete so please bring along something to keep the time going, you can do work on our free wifi or bring headphones to listen to a nice podcast or music to pass some time
