## LASER HAIR REMOVAL

During laser hair removal, a laser emits a light that is absorbed by the pigment (melanin) in the hair. The light energy is converted to heat, which damages the tube-shaped sacs within the skin (hair follicles) that produce hairs. This damage inhibits or delays future hair growth.

face & neck	R300
Face	R200
lip	R100
under arm	R200

## LASER SKIN TREATMENTS

It involves using lasers to help improve skin texture and appearance. Depending on your individual needs, your dermatologist may recommend either ablative or non-ablative lasers.

- vascular vein therapy
- acne inflammation & acne scarring
- pigmentation reduction
- fine line & wrinkle

price on request after consultation
